

# Risk Management Course

## Proactive Management of risk in accordance with ISO 31000

### Overview

Risk management is the identification, assessment, and prioritization of risks with a coordinated and economical application of resources to minimize, monitor and control the probability and/or impact of negative events or to maximize the realization of opportunities.

The course is based upon AS/NZS ISO 31000:2009, Risk management and risk management units of BSB07 Business Services Training Package.

Participants apply risk management tools and processes to their organisation, business unit, program or project, as appropriate.

Benefits of risk management:

- improved planning, control & governance
- optimised decision-making
- identification of opportunities and threats
- dealing with uncertainty and variability
- pro-active rather than re-active management
- better allocation and use of resources
- improved incident management
- reduction in loss
- improved stakeholder confidence and trust
- compliance with requirements/legislation

### Assessment and Award Options

The course may be completed with or without assessment leading to a:

- Statement of Completion (workshop) or
- Statement of attainment\* - BSBPMG508A (Diploma Unit) or BSBPMG608A (Advanced Diploma Unit)

\* AGS assessment via Agreement with Project Performance Group, Registered Training Organisation.

### Course objectives

- Develop a risk management plan
- Identify, analyse and treat risk
- Implement, monitor and evaluate plans

### Course Formats

Online and workshop mode. AGS deliver one and two day risk management workshops to suit client needs.

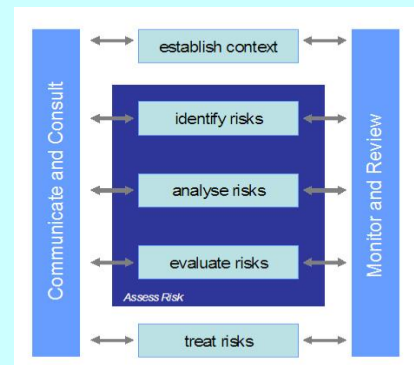

### Course Outcomes

*On finishing this course participants should be able to identify, assess, prioritise and treat risk in accordance with ISO 31000 and industry practice:*

- view risk at all levels (strategic, business etc)
- comply with methodologies, policies, procedures and legislation
- implement and monitor risk
- evaluate and improve plans, policies and procedures

### Course Content

- Risk Management Principles
- Risk Management Framework
- Risk Management Process
- Context
- Risk assessment
- Risk treatment
- Risk monitoring

Course material includes extracts from ISO 31000, definitions, checklists, examples and templates. Content cover hard (science) and soft (art) aspects of managing risk.
