

Risk Management Course

Proactive Management of risk in accordance with ISO 31000 and PMBoK

Overview

Risk management is the identification, assessment, and prioritization of risks with a coordinated and economical application of resources to minimize, monitor and control the probability and/or impact of negative events or to maximize the realization of opportunities.

The course is based upon ISO 31000:2018, A guide to the project management body of knowledge (PMBOK® guide) 6th and 7th edition, BSBPMG426 Apply project risk-management techniques, BSBPMG536 Manage project risk and BSBPMG632 Manage program risk

Participants apply risk management tools and processes to their organisation, business unit, portfolio, program, project or operations, as appropriate.

Benefits of risk management:

- improved planning, control & governance
- optimised decision-making
- identification of opportunities and threats
- dealing with uncertainty and variability
- pro-active rather than re-active management
- better allocation and use of resources
- improved incident management
- reduction in loss
- improved stakeholder confidence and trust
- compliance with requirements/legislation

Assessment and Award Options

The course may be completed with or without assessment leading to a:

- Statement of Completion (workshop) or Statement of attainment* - BSBPMG426 Apply project risk-management techniques (Cert IV Unit), BSBPMG536 Manage project risk (Diploma Unit) and BSBPMG632 Manage program risk (Advanced Diploma Unit)
