

# Risk Management Course

## Proactive Management of risk in accordance with ISO 31000

### Overview

Risk management is the identification, assessment, and prioritization of risks with a coordinated and economical application of resources to minimize, monitor and control the probability and/or impact of negative events or to maximize the realization of opportunities.

The course is based upon ISO 31000, Risk management and risk management units of 2013 (Certificate IV & Diploma) and 2007 (Advanced Diploma) Business Services Training Package/ Innovation and Business Skills Australia.

Participants apply risk management tools and processes to their organisation, business unit, program or project, as appropriate.

Benefits of risk management:

- improved planning, control & governance
- optimised decision-making
- identification of opportunities and threats
- dealing with uncertainty and variability
- pro-active rather than re-active management
- better allocation and use of resources
- improved incident management
- reduction in loss
- improved stakeholder confidence and trust
- compliance with requirements/legislation

### Assessment and Award Options

The course may be completed with or without assessment leading to a:

- Statement of Completion (workshop) or
- Statement of attainment\* - BSBPMG415 (Cert IV Unit), BSBPMG517 (Diploma Unit) or BSBPMG608A (Advanced Diploma Unit)

\* AGS assessment via Agreement with [Project Performance Group \(Registered Training Organisation\) Registration number 90922.](#)

### Course objectives
